Louise van den Berg
Web App Developer

Johannesburg
South Africa
louisevdb84@gmail.com

Interested in freelancing and open source projects using React.js, Node.js, PostgreSQL, C# etc.

Experience _____

Movie and TV Show Tracker February 2018 – Current
An app to keep track of movies and tv shows
React.js, CSS, Tachyons, MoviedbAPI, PostgreSQL

Online Portfolio March 2018
The profile you are currently looking at. React.js, UI-Router/React, CSS, React-Bootstrap, Bootstrap

Goal Achiever October 2017 – December 2017
A web app which is also mobile friendly to log your time spent on each task. ASP.NET MVC, C#, Enity Framework, MSSQL, Bootstrap

Junior Software Developer July 2017 – October 2017
A company which offers a Warehouse Management System. I added new views/functionality and reports on the system using C#, WinForms, SVN and Crystal Reports.

Personal Finance App 1 July 2016 -31 December 2016
Personal finance app where you can process all your expenses and balance with you bank account. ASP.NET MVC, C#, Enity Framework, MSSQL, Bootstrap

Document Developer October 2013 – February 2015
Using XF Designer to design templates which are used as building blocks in the main template (Policy Schedules). Also designed letters. XF Designer uses logic to build conditions in the policy schedule so that it is customized and display only the relevant information which applies to certain customers and certain options etc. JavaScript to write custom functions in the template. XF Designer's back-end is in XSLT. I have experience in XSLT coding and problem solving. Write basic select queries in Oracle to select policy numbers with certain criteria.
